Black Codhers Software Engineer

Overview

The Black Codhers Software Engineer Front End skills bootcamp, includes HTML, CSS, JavaScript and React programming.

You will also get a chance to take part in projects to put your skills to the test.

Additionally this course gives you career support to prepare you for interviews and a career in technology after the course, in a number of junior tech and security roles.

What will I learn on this skills bootcamp?

You will learn the fundamentals of front-end development including version control and using the Command Line.

You will get a chance to use the skills you learn in practical labs and also a final 2week commercial project.

We will also prepare you and support you to get a new career in the technology industry, through supporting your personal development.

Modules covered

Modules you will learn:

- Version control and Command Line
- Introduction to HTML and CSS
- Introduction to programming with JavaScript
- Using Front-end Framework
- Group project
- Career preparation

How is the Skills Bootcamp delivered?

This is a part-time 16-week programme, with 13 weeks of course content, which includes two evenings a week of guided learning plus self-learning, followed by three weeks of a group project, which is delivered remotely in the evenings.

Am I eligible to take part?

The course is fully funded and open to residents of the North West aged 19 or over, who are either in-work, looking for work, or have been unemployed for 12 months or less.

In addition to this, you must be a black female as Black Codhers courses are all run with the purpose of getting more black women into technology careers.

Idman Hussein

Full stack engineer at Zappi
Graduate Black Codhers

The Black Codher bootcamp was a life-changing experience for me as it enabled me to land my first job as a software engineer.

The support from the mentors and volunteers was amazing and it really allowed me to develop a growth mindset when it came to my career aspirations. The bootcamp was challenging and helped me to cultivate the skills that I need in my job now.

I am now a software engineer at a market research and insights company. It's an exciting industry to work in and the standards for their software is high. My role is more full-stack, so I find myself working on different codebases with both frontend and backend technologies.

CODING PROGRAMME

WHAT COMES NEXT?

With this training, you can go into careers in: Dev Ops, Games Development, Front-end Development, Software Development, Software Engineering, Testing, Web Development, QA

If you don't feel ready to become a fully-fledged Junior, in any of these areas, we also offer the possibility of continuing onto a Level 4 Apprenticeship in Software Development, Cyber Security or Data Analytics, depending on your previous qualifications.

About Black Codhers

This Black Codher Skills Bootcamp is a 16week Front-End Coding course for black women, that provides training for skills that would qualify you for junior technology roles.

This programme is for women who have an interest in getting into a career with technology.

The Black Codeher Skills Bootcamp will empower individuals from the North West with the skills and knowledge to become web/mobile application developers.

About HOST

Skills City is based at HOST, the Home of Skills & Technology at MediaCityUK. Established in 2012 by Salford City Council, it has played a major role in establishing Greater Manchester as a leading digital city region.

Skills City as part of HOST comprises leading digital technology skills bootcamps. Working in collaboration with employers at all levels, we connect you to the most dynamic and innovative organisations in the North West. Skills City aims to break the barriers faced by those from underrepresented and disadvantaged backgrounds, by fast-tracking 450 people into careers in digital technology every year.
